

Indoor Teambuilding

Crime Scene Investigation

EVENT FACTS:

Duration: Approx. 3 hours

Location: Nationwide

Group Size: 5-150

A body has been found and you're the first CSI team on the scene! Piece together the evidence to solve the case. Using genuine techniques including finger print analysis, chromatography, fibre identification and ultra-violet lighting, you'll comb the scene for clues.

Kitted up in forensic suits, dust for fingerprints to compare with prints from the suspects before interviewing the witnesses. You will need to build a fool proof case before interrogating the accused.

The CSI event encourages team bonding; it is a great fun, mentally stimulating and a chillingly convincing challenge! We'll have your team scratching their heads as they piece together the puzzle, before experiencing the thrill of solving a realistic murder mystery...

Using forensic techniques you'll recognise, scan the crime scene with black light to pick up bodily fluids. Then analyse clothing fibres found on the weapon to see if they match the clothes worn by the suspects.

Compare the finger prints you recover against your suspects'. No one piece of evidence will incriminate the murderer, you'll have to build a case. Piece together the evidence to learn the sequence of events. Who has a motive? Do they have an alibi?

Key Benefits:

-  Problem Solving
-  Communication
-  Motivate
-  Leadership

What's Included:

-  Forensic chemicals and tools
-  Event management & instruction
-  CSI suits
-  Professional Actors

Optional Extras:
