

Indoor Teambuilding

# Crystal Challenge

## Activity Descriptions

### Photo Mission

Your team's given 10 photos and a polaroid camera. You need to take new photos to replicate the 10 originals. This will come down to the zoom, angle and even the shading and light on the object.

### Interlocker

A game of strategy and logic. Interlocker sees teams attempting to re-create a complicated grid pattern using the interlocking pieces provided.

### Plexus Puzzles

Here, teams are given a series of brainteaser puzzles including Tangrams, Towers of Hanoi, 3D Cube and the Greek Puzzle. All must be completed in the allotted time in order to succeed.

### Brunel

Your team is presented with a problem – you need to engineer a solution using construction equipment which resembles a giant Meccano set. Think and build fast, and make sure you keep your hard hat on!

### Microdot

One half of the team have a complex map of the circuits of a 'micro-dot.' They must communicate the detail of the circuit over one-way radio to the other half of the team who attempt to re-create the circuit.

### Cube Conundrum

Your team is presented with 27 cubes and a list of 6 riddles. Using the 27 cubes they must build one large single cube with a completed image on each face which answers a riddle on the board.

Indoor Teambuilding

# Crystal Challenge

## Activity Descriptions

### Mindfields

There are 6 boards linked together in the centre of the table, each has a given set of rules that must be followed to reach the centre and unlock a crystal.

### Dilithium Run

Your task is to transport the silver star-balls via a set of pipe work. Riddled with holes, each team member holds a section of pipe, to get the star-balls to the constellation board where you must get each ball into its pod to complete the constellation.

### NASA Moon Project

This mental challenge that puts teams in a situation where they have crash landed on the moon. They have a list of items that they must put into a list of priority in order to survive. This was actually a test that NASA carried out on their astronauts!

### Paper Towers

Your team uses a ream of paper and sticky tape to build towers as high as they can. Bonus crystals for eccentric engineering and recreations of famous architecture!
