

Indoor Teambuilding

Crystal Challenge

EVENT FACTS:

Duration: Approx. 2-4 hours

Location: Nationwide

Group Size: 10-200

Paying tribute to the famous TV show 'Crystal Maze', the Crystal Challenge pitches your group into an exciting and unique teambuilding experience with ingenious cerebral and spatial challenges.

Just like on TV, the successful completion of each task is rewarded with crystals that will be tallied at the end to find the winning team. This event combines competition and teamwork in an enthralling set of team building challenges.

Our Event Manager will brief you on the format of the event before splitting the group into teams of about eight people.

- | | | |
|---------------------|----------------|------------------|
| 🧩 Brunel | 🧩 Paper Towers | 🧩 Photo Mission |
| 🧩 NASA Moon Project | 🧩 Plexus | 🧩 Mindfields |
| 🧩 Dilithium Run | 🧩 Interlocker | 🧩 Cube Conundrum |
| 🧩 Microdot | | |

After approximately 20-25 minutes, the whistle goes and teams rotate around to the next challenge. Friendly competition becomes very enthusiastic as teams maximise their performance for more crystals!

This event is great for those who'd like a teambuilding experience which is not only fun, but also relevant to business. The activities in the Indoor Crystal Challenge are easily relatable to the office. The characteristics of leadership, lateral-thinking, planning, and team work that they are designed to foster, are all great business assets.

Key Benefits:

- 🧩 Communication
- 🧩 Problem Solve
- 🧩 Team Cohesion
- 🧩 Friendly Competition

What's Included:

- 🧩 A combination of the above activities, according to group size and budget
- 🧩 Medals for the winning team
- 🧩 Event management and experienced instructors

Optional Extras:

- 🧩 Event Photography or Filming
- 🧩 Upgraded prizes – Champagne, Chocolates, Trophies
- 🧩 Team clothing – Shirts, Caps etc.

Indoor Teambuilding

Crystal Challenge

Activity Descriptions

Photo Mission

Your team's given 10 photos and a polaroid camera. You need to take new photos to replicate the 10 originals. This will come down to the zoom, angle and even the shading and light on the object.

Interlocker

A game of strategy and logic. Interlocker sees teams attempting to re-create a complicated grid pattern using the interlocking pieces provided.

Plexus

Here, teams are given a series of brainteaser puzzles including Tangrams, Towers of Hanoi, 3D Cube and the Greek Puzzle. All must be completed in the allotted time in order to succeed.

Brunel

Your team is presented with a problem – you need to engineer a solution using construction equipment which resembles a giant Meccano set. Think and build fast, and make sure you keep your hard hat on!

Microdot

One half of the team have a complex map of the circuits of a 'micro-dot.' They must communicate the detail of the circuit over one-way radio to the other half of the team who attempt to re-create the circuit.

Cube Conundrum

Your team is presented with 27 cubes and a list of 6 riddles. Using the 27 cubes they must build one large single cube with a completed image on each face which answers a riddle on the board.

Activity Descriptions

Mindfields

There are 6 boards linked together in the centre of the table, each has a given set of rules that must be followed to reach the centre and unlock a crystal.

Dilithium Run

Your task is to transport the silver star-balls via a set of pipe work. Riddled with holes, each team member holds a section of pipe, to get the star-balls to the constellation board where you must get each ball into its pod to complete the constellation.

NASA Moon Project

This mental challenge that puts teams in a situation where they have crash landed on the moon. They have a list of items that they must put into a list of priority in order to survive. This was actually a test that NASA carried out on their astronauts!

Paper Towers

Your team uses a ream of paper and sticky tape to build towers as high as they can. Bonus crystals for eccentric engineering and recreations of famous architecture!
