8-200

Welcome to "Pedal for Purpose," a unique charity-focused event where your team will build bikes that make a real difference. Working together, your group will construct new bicycles to be donated to local charities, giving the gift of mobility to those in need. This inspiring activity combines collaboration, creativity, and the joy of giving back, making it an unforgettable experience for everyone involved.

The event begins with a series of unique challenges. First up in the 3-wheel bike challenge. Our staff will set up a course and the riders will wear a blindfold. Teammates will need to communicate effectively to help navigate the track. One of the more creative challenges involves teams creating a fashion item from bike materials and presenting them to the rest of the room during a fashion show at the end of the activity. Other challenges include changing an innertube against the clock, and all challenges encourage communication, creativity as well as friendly competition.

After a short break, teams will begin the bike build. Our experienced team will show teams how to put a bike together and how to make the necessary adjustments to make them road worthy. The highlight of the event is a thrilling relay race, where teams compete head-to-head. With teammates cheering from the sidelines, it's a moment of camaraderie and excitement as everyone rallies for the win! All tools will be provided and after the build, our team will take care of finding the bikes a new home. Please let us know if there is a preferred organisation that you would like the bikes donated to.

What's Included:

-  Bike frames & toolkits
-  Professional bike technicians
-  Event management coordination

Optional Extras:

-  Event photography or filming
-  Upgraded prizes: Trophies or Medals
-  Custom clothing; Caps, Overalls, T-Shirts
